

**UNITED NATIONS ENVIRONMENT
INTERNATIONAL INSTITUTE OF REFRIGERATION
ASSOCIAZIONE DEI TECNICI DEL FREDDO
CENTRO STUDI GALILEO**

Working together with the major experts towards "The future of Refrigeration"

***Outline of the International Special Issue
2019-2020***

**UN Environment – International Institute of Refrigeration –
Centro Studi Galileo (Italy) – Associazione dei Tecnici Italiani
del Freddo (Italy) – European Energy Centre (UK)**

Recipients.

The magazine is a not for profit publication. It will be issued and delivered free of charge to anyone who is interested in the publication.

Partners.

Our selection of authoritative close partners involved in the realisation of this special issue of the magazine include: United Nations Environment (UNEP) – International Institute of Refrigeration (IIR) – Centro Studi Galileo (CSG) – Associazione dei Tecnici Italiani del Freddo (ATF) – European Energy Centre (EEC).

Distribution.

The magazine will be distributed at:

- Official UNEP meetings:
 - o 31th Meeting of the Parties to the Montreal Protocol (MOP), November 2019 - Rome- Italy
 - o 25th Conference of the Parties (COP) December 2019 - Chile
- Meetings and conferences organised by IIR, UNEP and CSG
- The XIX European Conference, Milan, Italy, June 2021
- Exhibitions, MCE2020, ChillVenta2020
- Major global associations, institutions, GOs, NGOs involved in heating, ventilation, air conditioning and refrigeration (HVAC & R)
- To all operators connected with Centro Studi Galileo (AREA, ASHRAE, AHRI, ABRVA, ISHRAE, IIAR, EPEE, REHVA, ECSLA, CAR)

ASSOCIAZIONE DEI TECNICI DEL FREDDO
CENTRO STUDI GALILEO**

Working together with the major experts towards "The future of Refrigeration"

Layout.

The magazine will be published in hardcopy and electronically. The magazine will contain around 52 colour pages. The pages will contain photos and documentation of the XVIII European Conference, taking place on 6-7 June 2019, organised by UN Environment OzonAction, the International Institute of Refrigeration, Centro Studi Galileo, Associazione dei Tecnici italiani del Freddo, the European Energy Centre. The heading, layout and graphics will be similar to the ones already used in the previous International Special Issues 2006-2008-2010-2012-2014-2016-2018. This will be the 8th edition.

Cover.

The cover page will have the main heading *Industria & Formazione*, it will feature the logos of UN Environment, IIR, CSG, ATF and EEC. Underneath the heading will appear a brief sentence regarding the activity of collaboration between IIR-UNEP-CSG- ATF-EEC with the objective to train and inform on energy, environment, refrigeration and air conditioning. The Kigali Amendment, its implementation and related activities will have a reference in the cover.

Preface.

As in previous issues, the following dignitaries will be invited to provide forewords: Inger Andersen United Nations Under-Secretary General, Executive Director of UN Environment, Italian Minister for the Environment, Didier Coulomb IIR.

Glossary and contents.

- Air conditioning and Refrigeration
- Cold Chain
- Renewable Energy
- Heat pumps

The technical articles will address the current exploitable and available technologies in air conditioning, refrigeration and heat pumps that protect the Earth's climate and stratospheric ozone layer, specifically those that avoid high GWP options and which are energy efficient (including renewable energy options, such as solar photovoltaic, solar thermal, etc.) The articles will be selected so as to have a balance in terms of both the technical subjects and the region. A special section dedicated to the "Food Cold Chain in Montreal Protocol" will be created and the authors are welcomed to select it and write about this topic.

Working together with the major experts towards "The future of Refrigeration"

Authors.

The authors who submit articles should have significant technical expertise in the field of refrigeration, air conditioning and heat pumps. A balance in gender will be considered. Authors could be part of industry associations, government organizations, universities, research centers, institutes, etc. No private companies will be invited to submit an article.

Topics.

The preferred topics for articles include: EU's F-Gas regulations and international developments, refrigerant charge reductions, refrigerant leakage reductions, certification of personnel, safety of flammable refrigerants, training on handling refrigerants, low-GWP RAC technologies for high ambient temperature regions, low-GWP and energy efficient refrigeration and air conditioning technology, low-GWP solar refrigeration and air conditioning technologies, refrigeration and air conditioning standards, illegal trade in ozone depleting and high global warming refrigerants, heat pumps. Articles on any of the above-mentioned topics additionally featuring A-5 Developing Countries as subjects/examples/authors, would be particularly welcome (though not mandatory).

Modalities.

The publication will include up to 10 articles. Each article, in English, should be no longer than a 6-page Word document (using Arial font, size 12, justified). The author should write the article keeping in mind the target audience will be environmental and energy efficiency operators connected to the new technologies in refrigeration, air conditioning and renewable energy. The articles should be understandable by mid-level operators and contain no algorithms or overly-complex formulas, whatever the technical nature, to ensure that they are readable by the largest possible audience. Pictures, graphs or drawings (possibly one picture every page) will be appreciated.

- Deadline for receiving the abstract: **Friday, 2nd August 2019**
- Deadline for receiving the paper: **Monday, 16th September 2019**

Contacts.

Please send any abstract, article or question to the publication's Secretariat:
